RIVER CONSERVATION UNDER WATER SCARCITY

Integration of water quantity and quality in
Iberian Rivers under global change

OBJECTIVES and TOPICS

SCARCE is a multipurpose project that aims to describe and predict the relevance of global change impacts on water availability, water quality and ecosystem services in Mediterranean river basins of the Iberian Peninsula, as well as their impacts on the human society and economy. The project has assembled a multidisciplinary team of leading scientists in the fields of hydrology, geomorphology, chemistry, ecology, ecotoxicology, economy, engineering and modelling, in an unknown effort in the CONSOLIDER framework. The topics of the Final SCARCE International Conference are:

- Integrating the effects of chemical quality with environmental stressors on biodiversity and human risks
- Linking chemical exposure and biological effects
- Integrated assessment of water quantity and quality and Global Change
- Integrating results to predict global change impacts on freshwater ecosystem services
- Global change and adaptation and mitigation measures

- Prediction of future threats and mitigation proposals in the light of the analysis of the economic and social impacts

- Water scarcity, freshwater ecosystem services and integration in RBMPs

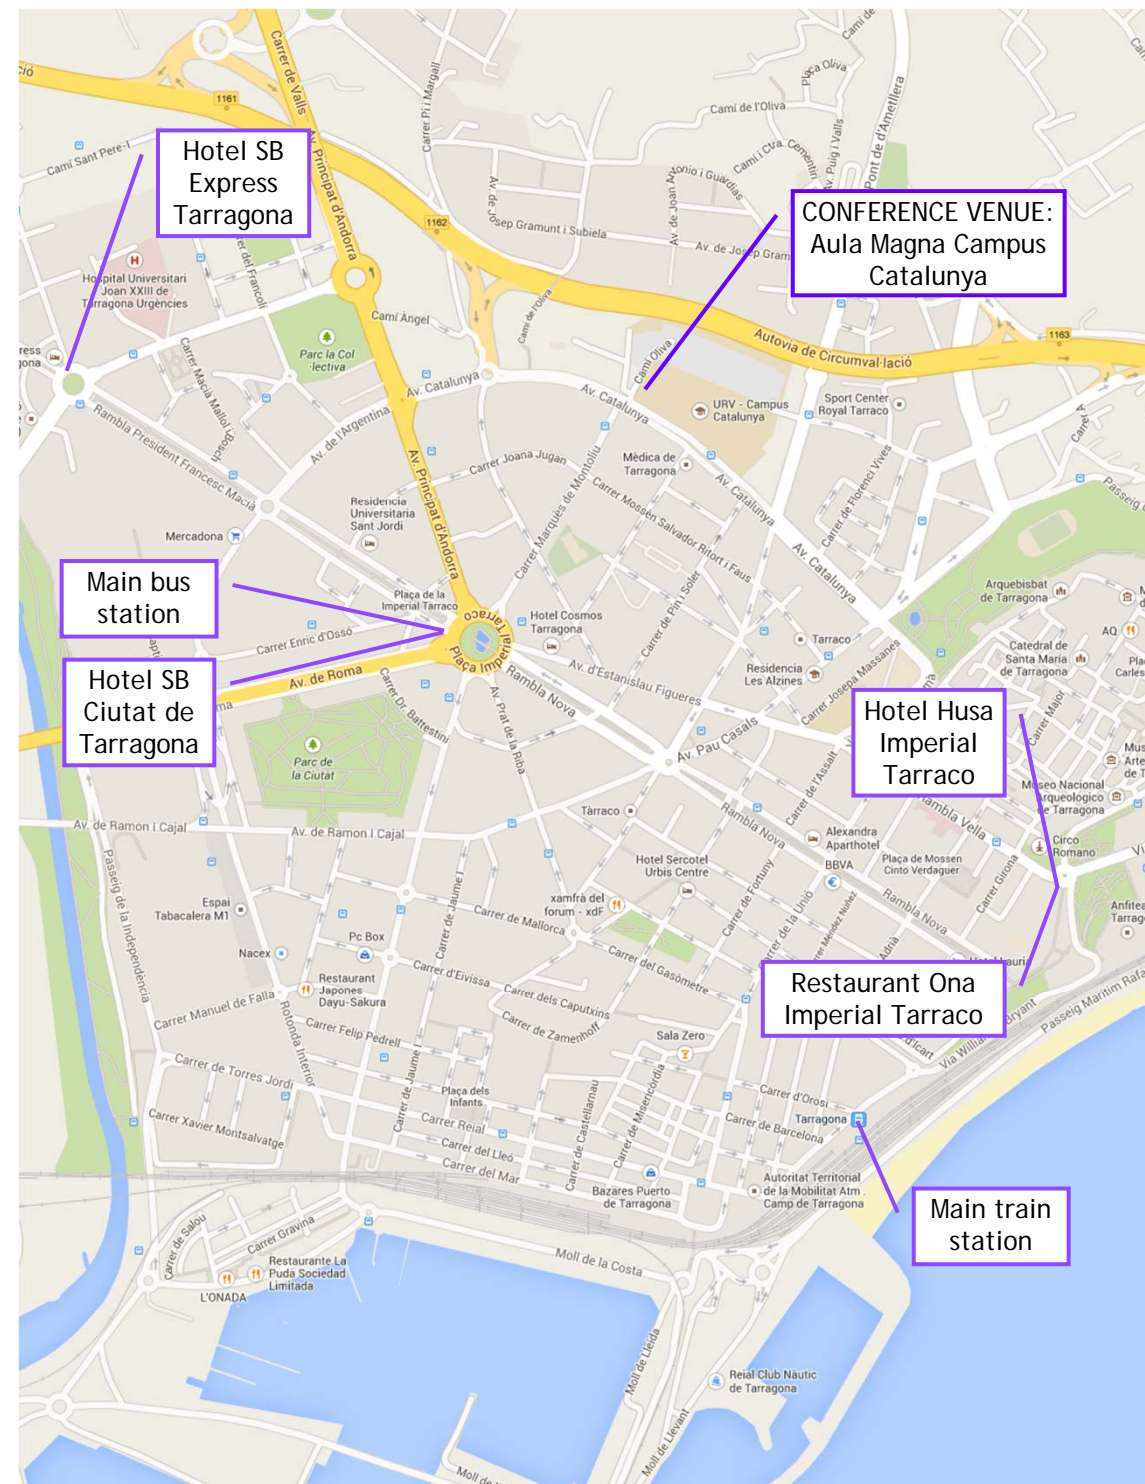

- Integrating science and policy

Integration of water quantity and quality in Iberian Rivers under global change is a core element in this Conference. This SCARCE conference will provide a multidisciplinary framework for discussion of integration of basic research, like long-term patterns and mechanisms that operate in the hydrology, water quality, habitat dynamics, ecosystem structure and function of watersheds, and the effects of climate and global change on the ecosystem services they provide, with water management practices.

The Conference is planned in form of oral talks, posters and discussions, where experts from different fields can share their knowledge.

The conference invites to anyone working on water sustainability to share knowledge to face a changing world in water resources management.

CALL for ABSTRACTS

The meeting will include invited speakers and contributed key note lectures and posters. Submission of abstracts is opened to both SCARCE and non-SCARCE assistants. Preference to oral presentations will be given to those submissions considering general overviews and summaries of projects related to the subjects of the meeting. A limited number of oral presentations can be accepted.

Abstracts (in English) for oral (max. 4 pages) and poster presentations (1 page) should be submitted to the Secretariat before **July 31st, 2014**. Please use the template available at www.scarceconsolider.es.

Posters must be no larger than A0 format. If received late, the abstract will be selected for the poster session.

The acceptance of the contributions will be communicated to the authors on **September 5th, 2014** the latest.
