The partners have been working on Project Result 3, the Customised Digital Circular Economy Space for SMEs, which is a digital training resource. Considering the information gathered from the SME CE Skills & Readiness Verification Tool (Project Result 2), it will provide the learners with a set of recommended training resources matching their customised learning paths.

The English version of Project Result 3 will soon be available on the project website. The partners will also provide translations in 5 languages: Polish, Slovenian, Spanish, Portuguese, and Romanian.

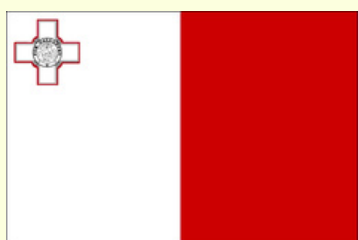

Between 3 and 5 October, DISCERN partners met in Mosta, Malta and participated in the Learning, Teaching and Training Activities to strengthen their overall understanding of using the CE Coach and personalised learning paths, teaching sustainability and the Collaborative Entrepreneurship Education Course, and more. The partners also discussed the overall progress of the project, including project results, further tasks, and ways of promoting and disseminating the project.
